

Get Comfortable With Off-Peak Electricity!

STEFFES ETS SYSTEMS

Steffes ETS systems store heat during off-peak hours when electricity costs are at the lowest, then release it when it is required throughout the day.

OFF-PEAK RATES

With off-peak rates you save roughly half-off standard electricity during off-peak periods of the day.

STEFFES + OFF-PEAK RATES

It automatically delivers savings by storing the heat while taking advantage of the cheaper off-peak power rates.
