

## ROOM HEATERS

Steffes's room heaters are designed to warm your home using Electric Thermal Storage (ETS) technology, providing clean, consistent heat for rooms of any size.

Our room heaters are ideal for retrofitting electric baseboard-heated rooms, supplementing an existing heating system, or heating a new addition to your home or business. Multiple heaters can be coordinated to operate together for increased heating capacity.

From single-family homes to large commercial buildings, and multi-family housing units like apartment buildings, Steffes ETS systems provide a reliable source of heat while saving energy and reducing the high costs associated with inefficient traditional heating systems.

### SAVE MONEY ON YOUR HEATING BILL

Many power companies offer "off-peak" rates to encourage electricity use during periods of the day when demand is lower. These rates can be substantially less than the general service, allowing significant savings on your heating bill.

### HOW THEY WORK

Unlike traditional electric heaters, Steffes ETS room heaters convert electricity to heat during "off-peak" hours, when the demand and price of electricity is lower. Specially-designed ceramic bricks within our heaters store vast amounts of heat for extended periods of time.

That heat is released into your home exactly when it needs it. And, with multiple models available, you will be comfortable no matter the size of your space.

## ROOM HEATER DESIGN FEATURES

- 100% efficient
- Easy to operate
- No routine maintenance
- Quiet variable speed blower
- Safe, clean, comfortable heat
- No smoke, no fumes, no mess
- Manufactured in North America
- 5-Year limited manufacturer's warranty
- Built-in digital room temperature thermostat

### ACCESSORIES

#### OUTDOOR TEMPERATURE SENSOR

Communicates the outdoor temperature to your room heater, allowing it to regulate the amount of heat stored in the heater's bricks.

#### REMOTE ROOM TEMPERATURE SENSOR

Regulates the amount of heat stored in the heater's bricks based on a temperature reading from a different location within the same room as the heater.

#### STEFFES CONNECT (TRANSCIVER OR HUB)

Connects the room heater to a mobile device, allowing you to adjust a number of settings remotely using the Steffes Connect app.

## UL LISTED

All Steffes ETS products undergo rigorous safety testing by UL Solutions. Our room heaters are equipped with internal safety devices to protect from overheating, and we ultra-insulate the brick cores to minimize the heaters' surface temperatures.

### ROOM HEATER PRODUCT DETAILS

MODEL	ENERGY STORAGE CAPACITY <sup>1</sup>	APPROXIMATE INSTALLED WEIGHT	DIMENSIONS			CLEARANCE REQUIREMENTS			
			LENGTH	HEIGHT	DEPTH	TOP	FRONT	SIDES	BACK
RD10	10 kWh	235 lbs	38"	24.8"	7.75"	12"	15"	2"(L) 15"(R)	0" <sup>3</sup>
2102	13.5 kWh	276 lbs	30"	24.5"	12.25"	4"	15"	2" <sup>2</sup>	1.5"
2103	20.25 kWh	385 lbs	37"	24.5"	12.25"	4"	15"	2" <sup>2</sup>	1.5"
2104	27 kWh	493 lbs	44"	24.5"	12.25"	4"	15"	2" <sup>2</sup>	1.5"
2105	33.75 kWh	601 lbs	51"	24.5"	12.25"	4"	15"	2" <sup>2</sup>	1.5"
2106	40.5 kWh	708 lbs	58"	24.5"	12.25"	4"	15"	2" <sup>2</sup>	1.5"

<sup>1</sup> Storage capacity values are nominal, actual performance depends on operating conditions and system configuration.

<sup>2</sup> A clearance of 15" is recommended on the right side of heater to ensure accurate room temperature sensing and for servicing purposes. If less than 15" is available, an optional remote room temperature sensor is available.

<sup>3</sup> For proper operation, maximum baseboard size behind the heater MUST NOT exceed 4.75" high (measured from sub-floor) and 0.75" deep.

Manufacturer reserves the right to discontinue or change at any time, specifications or designs, without notice or incurring obligations.
